Map and Skills Details

Using cartography and analysis skills, I have created a map of my home: Tukwila Washington. I took a shapefile of Tukwila, exported from King County Cities, and used it as a 'clip feature' to create a series of clips from some of my other shapefiles. There were shapefiles I exported to create new ones that show features exclusive to my home town. The citron yellow, Washington locator map contains a red border frame that surrounds my home town's location on it. Specific symbols are used to represent police stations, schools, fire departments, and medical centers. Roads are light gray. Water bodies and rivers are delft blue. Parks are macaw green. King County Cities are leaf green and have a 2.0 width outline to differentiate different areas. My shapefiles were from King County GIS and WAGDA.
